FARQ: recording guide for the enrolled team member

Team Off-Grid · Amazon AI Cyber Security Hackathon · about 30–40 minutes of your time

FARQ checks a forwarded video against genuine recordings of the person in it. For our demo, **you** are that person. We need genuine videos of you speaking, so FARQ can learn your normal face, voice and movement, and so we can make test fakes from them on-site.

1. Consent (record this first)

Record a short video named **consent-video-<your initials>.mp4** saying:

> "My name is ____. I agree that Team Off-Grid may record videos of my face and voice, use them to build and test FARQ during this hackathon, and make test fake videos from them on-site, which will only be shown at this event. All of it will be deleted afterwards."

2. Set-up (same for every clip)

- Phone camera in **landscape** (sideways), **1080p**, at eye level, about **1 metre** away.
- Face and shoulders in frame, looking at the camera like a news statement.
- Even light on your face: face a window or lamp, no bright light behind you.
- Quiet room, no fan or music. Lean the phone on something so it stays still.
- Plain background is best. Keep the same place for all clips.

3. How to speak

- Speak naturally, in Hindi, English or both, the way you normally talk.
- **Move your head and eyebrows as you normally do.** Don't hold still. FARQ checks that head and eyebrow movement fits the voice, so natural movement matters.
- No script needed. Small slips are fine: keep going, don't restart.
- Each clip **30 to 90 seconds**.
- **Don't mention** real investment schemes, real phone numbers or real UPI IDs.

4. The clips (one topic each)

File name	Talk about
lib-01-intro.mp4	Introduce yourself and what you study or work on
lib-02-upi.mp4	How UPI payments work, for someone new to them
lib-03-saving.mp4	Your advice on saving money as a student
lib-04-hometown.mp4	Describe your hometown
lib-05-forwarding.mp4	Why people should check videos before forwarding them
lib-06-news.mp4	A recent news story you found interesting
lib-07-password.mp4	How to set a strong password
lib-08-event.mp4	A short “official announcement” of a made-up college event (date, time, place)
lib-09-food.mp4	Your favourite food and how it's made
lib-10-ai.mp4	What you'd build with AI if you had a month
lib-11-weekend.mp4	What you did last weekend
lib-12-advice.mp4	Advice for a first-year student

Ten is enough; twelve is better. Different topics make them clearly different recordings.

5. Optional, but it makes the demo much stronger: a mock scam pitch

Record **pitch-01-scam.mp4** in the same set-up, reading the script below like a confident advertisement. Everything in it is made up: the person, the organisation, the number, the UPI ID and the website (*example.com* is reserved for examples). **Never dial the number.** Change the name and the verb forms (e.g. “raha hoon / rahi hoon”) to however you'd naturally say it.

> Namaste doston. Main Rakesh Mehra, National Wealth Board ki taraf se baat kar raha hoon. Aaj main aapko ek special scheme ke baare mein bataunga.
> Is scheme mein aapko guaranteed forty percent return milega, sirf teen mahine mein. Yeh offer sirf is hafte tak hai, toh jaldi kijiye.
> Register karne ke liye hamare WhatsApp group mein join kijiye. Ya seedha call kijiye: nine eight seven six five, four three two one zero.
> Payment ke liye UPI ID hai: farq demo at ok fake bank. Ek baar phir: farq demo at ok fake bank.
> Zyada jaankari ke liye website dekhiye: bonus dot example dot com.
> Yaad rakhiye, aisa mauka baar baar nahi aata. Dhanyavaad.

If you can, record it **twice**: **pitch-01-scam.mp4** as above, and **pitch-02-scam-english.mp4** reading the same pitch in English. Each takes about 45 seconds.

6. Sending the files

- **Do not send them over WhatsApp.** WhatsApp shrinks videos, and we need the originals.
- Copy them straight off the phone (USB cable) or upload the original files to Google Drive and share the folder with the team lead.
- Keep the file names as listed above.

7. What happens to your videos

- Most of the clips go into FARQ's library as your “genuine recordings”. 2 to 4 are kept aside to test FARQ on videos it hasn't seen.
- Test fakes are made on-site with video-editing tools: for example, the picture from one of your clips with the voice from the scam pitch. They are shown only at this event.
- The files stay on the team laptop, are never uploaded to GitHub, and are deleted after the event.

Checklist

☐ Consent video ☐ 10–12 topic clips ☐ Head and eyebrows moving naturally ☐ (Optional) scam pitch, Hindi and English ☐ Sent as original files, not via WhatsApp
